

STINT CARGO

The Stint Cargo is a light electric vehicle developed for the use in dense urban areas. Versatile and very suitable for the last mile. With a range of 42 or 84 km, the battery has enough power for a day's work. You can step on and off the Stint easily while parking on the sidewalk. This makes the Stint Cargo ideal for activities that require many stops, like parcel delivery. Imagine the countless activities the Stint Cargo can support. Adding a mobile power supply and built-in tools, everything you need is at hand for service or maintenance work in the city center.

A. GULLWING DOORS

The gullwing doors offer quick and easy access to the cargo space and can be opened on both sides. Gullwing doors are convenient in narrow urban areas, where a traditional door would block the street.

B. CARGO SPACE

The cargo space can fit 250 kg of cargo and has a volume of 1,2 m³. A compartment under the floor offers space for a spare tire and additional storage.

C. KEYLESS GO SYSTEM

The Stint Cargo is equipped with a convenient keyless access and keyless drive system. Within a range of 3 meters, the driver has keyless access to the storage area. A timesaver during routes with many stops.

D. BATTERY PACK OPTIONS

The Stint can be ordered with a regular (100Ah) or large (200Ah) Lithium LFP battery pack. This translates in a range of 42 km or 84 km. See all specifications on the next page.

60 MONTHS FULL WARRANTY ON MAINTENANCE. **AN ALL-IN SERVICE WHERE YOU DON'T HAVE TO WORRY ABOUT THE STINT.**

When purchasing (buying) a Stint, you can opt for Full Service. An all-in subscription for a fixed amount per month, where you do not have to worry about maintenance and service.

Tires and batteries will be replaced in good time. If there is any problem with your Stint, we will make sure you remain mobile. Our aim is to repair the vehicle you before your next ride; within 24 hours at most. No additional costs for repairs. Annual service is also included in the Full Service.

We take care of the following items of control and action:

- electronic components
- insight into data and GPS from communication box (via SIM card)
- operation of mechanical parts, such as steering and brakes
- operation of hydraulic parts, such as brakes
- tire wear check
- read out battery usage and capacity
- battery replacement
- replacement of worn components
- repairs
- alternative transport without additional costs
- mobile within 24 hours

There will be no other charges other than the monthly full service costs.

THE STINT CAN BE SIGNED AND DELIVERED WITH YOUR **OWN LOGO OR BRANDING.**

LOGO OR SMALL DESIGN

The Stint body is made of ABS, which is very suitable for graphic film. We can design and sign the Stint Cargo with your own logo or branding. A small logo design of maximum 1 m² is included in the price.

HALF WRAP OR FULL WRAP

It is also possible to half wrap or fully wrap the Stint.

HOW WE WORK:

1. Send us your logo or branding in vector format (EPS / PDF / AI).
2. Our graphic designer will prepare the design and send you the proposal.
3. You give your feedback or approval.
4. The Stint will be signed (sealed) and delivered.

LEGISLATION

European type-approval applies to the Stint according to Regulation (EU) No 168/2013 as vehicle type L6e-BU: Light quadri-mobile for utility purposes

Please consult your national road traffic regulations to see what conditions apply in terms of minimum age, helmet duty, place on the road, etc.

INSURANCE

In the Netherlands, the Stint must at least be insured for third party liability (Wettelijke Aansprakelijkheid, WA).

Upon delivery in other countries, you need to register the Stint under national road legislation and apply for insurance. Contact your local insurance company for more information.

**CONTACT US IF YOU NEED HELP
WITH INSURANCE OR NATIONAL LEGISLATION.**

POSSIBLE IN-VEHICLE EQUIPMENT

In collaboration with our partner Brover in The Netherlands, we can build your Stint Cargo in a way it fits your work perfectly. Do you need on-site power as well? No problem, we can equip the vehicle with a mobile power supply from Zeliox.

The images below are just some possibilities. Contact us for inquiries.

Note: in the visuals below, both gullwing doors are opened simultaneously. This is only done for the purpose of showing the in-vehicle equipment. In reality we don't recommend opening both doors at the same time because they may scratch.
